# Soberanes Fire Weather Forecast

Forecast Information  
& SPOT Forecasts

**FORECAST NO:** 81  
**PREDICTION FOR:** 0700 Wed - 0700 Thu  
**SHIFT DATE:** Wednesday, October 12, 2016

**NAME OF FIRE:** Soberanes  
**UNIT:** CA-BEU/LPF/MRD  
**SIGNED:**

*[Signature]*  
**Shawn Weagle**

**Incident Meteorologist**  
**Phone:** 503.956.7504

**FORECAST ISSUED:** 1900 Tuesday 10/11/16

**\*\*\* Wetting rains looking increasingly likely by the end of this weekend \*\*\***

**Weather Discussion:** Today should be very similar to yesterday, with a 3,000' deep marine layer producing extensive morning low cloudiness across much of the fire area. Above 3,000 feet in elevation, conditions will be much drier to start with RH starting off in the teens. Similar to yesterday, these higher ridgetop elevations should see their driest RH values in the morning then improve throughout the day. Low clouds should break up by midday, with a mostly sunny afternoon. Temperatures remain near to slightly below normal today. General winds remain light today, allowing seabreezes and/or up-canyon winds to dominate midday and afternoon. The marine layer should be a little shallower tonight and Thursday, allowing for warmer and drier conditions inland. High clouds will increase later Thursday as an unseasonably strong Pacific frontal system approaches... more on that in the extended discussion below.

## WEATHER FORECAST for Today (Wednesday, October 12):

	Ridgetops / Upper Slopes	Valleys / Lower Slopes
<b>Weather</b>	Mostly Sunny	Mostly Cloudy in the morning, becoming Mostly Sunny in the afternoon
<b>Highs</b>	68 - 74° ( <i>little change</i> )	Inland: 70 - 78°    Coast: 57 - 65° ( <i>little change</i> )
<b>Min RH</b>	12 - 20% early, then rising to around 40% in the afternoon.	Inland: 25 - 40%    Coast: 55 - 70% ( <i>little change</i> )
<b>20 ft Winds</b>	E-SE 1-4 mph early, becoming W-NW 5-8 mph in the afternoon. <b>Coastal Ridge:</b> SW 5-10 mph with gusts to 20 mph in the afternoon.	Upslope 2-6 mph, becoming Upcanyon 5-10 mph with gusts to 15 mph in the afternoon.

**Marine Layer:** Around 3,000' MSL.

**Haines:** 3

**WEATHER FORECAST for Tonight:** Partly cloudy. Coastal low clouds increasing and spreading into the coastal valleys overnight. Top of the marine layer will lower to 2,000 to 2,500 feet. Lows mainly in the 40s, except 50s coast and above the marine layer. RH falling to 15-25% on upper slopes and ridges above 3,000' elevation. Otherwise excellent humidity recovery. Winds generally down-drainage 5 mph or less.

## OUTLOOK for Thursday, October 13:

<b>Weather</b>	Partly cloudy. Low clouds clearing from the coastal valleys between 1000-1100. Increasing clouds late afternoon and evening. Slight chance of rain late Thursday night.	
<b>Temps</b>	<i>Highs:</i> 60-68° coast, 68-74° ridges, 78-84° inland valleys.	<i>Lows Thu Night:</i> 48 to 58°
<b>RH</b>	<i>Min:</i> 20-30%, except 55-75% coast. Early morning RH 10-20% higher ridges.	<i>Max Thu Night:</i> 70-90%
<b>20 ft Winds</b>	Becoming up-canyon 5-10 mph by 1100, with afternoon gusts 15-20 mph. Ridgetop winds SE 3-7 mph until 0900, becoming S-SW 5-10 mph with gusts to 20 mph.	

**EXTENDED OUTLOOK (Friday through Sunday):** Wetting rains appear likely across much of the fire Friday as a moisture-laden Pacific frontal system moves through. Best estimate on rainfall totals range from 0.10" to 0.20" for drier south and east portions of the fire to up to 1 inch along the coastal ridge. S-SW winds will be strong ahead of the front, with gusts 40 mph possible. A break is expected Saturday before another system brings a decent chance for showers Sunday. Drier weather looks to return next week.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 80/81	<b>TYPE OF FIRE</b> Wildfire
<b>FIRE NAME:</b> Soberanes Fire	<b>OPERATIONAL PERIOD</b> 10/12 /2016 Day Shift
<b>DATE ISSUED</b> 10/11/2016	<b>TIME ISSUED</b> 1700 HOURS
<b>UNIT</b> CA-BEU-003422	<b>SIGNED</b> Scott Cones, FBAN <i>SCC</i>

### INPUTS

**\*\*\*Review Weather Forecast for details\*\*\***

*Low daytime temperatures. Moderate RH recovery. Light afternoon winds.*

### FIRE BEHAVIOR

#### GENERAL

Current fuel conditions will only support fire spread in areas of optimal alignment. Impacts from wind will be moderate. Resources responding to a new initial attack or fire outside containment lines can expect minimal resistance to control due to increased RH and reduced winds. Live fuel moistures remain low due to prolonged drought conditions and will take time to fully recover. Forecasted (10/12/16) ERC: 62 - BI: 64.

#### Optimal Alignment - Peak Burning Conditions

POI = 70%    Spotting Distance= up to 1/4 Mile.    ROS 40 + ch/h    Fine Dead Fuel Moisture = 5 %

#### LOCAL THRESHOLDS – WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:	20' wind Over 7mph	RH Less Than 17%	Temperatures Over 98°	10hr fuel Less than 6%
-------------	-----------------------	---------------------	--------------------------	---------------------------

#### SPECIFIC

- Heavy fuels will continue to burn out and may be problematic where close to the fires edge. Detection of new smokes will moderate with improved weather conditions. Creeping and smoldering can be expected.
- Areas of concern remain in remote and inaccessible terrain.

#### AIR OPERATIONS

Morning marine layer may impact aviation operations.

#### SAFETY

Base all actions on current and expected behavior of the fire.

# Soberanes Fire – Safety Message

Now is not the time to let your guard down...

INCIDENT #CA-BEU-003422

DATE: 10.12.16

TIME: 0700-1900

## Major Hazards and Conditions

- *Traffic Hazards and Driving*
- *Complacency and Transition*
- *Working in steep terrain*
- *Hazard Trees in Fire area and Weakened Trees in both Toro and Rana camps*
- *Working around Heavy Equipment in the suppression repair groups and road group*

## **Let's remember what happened on this ground...we lost one of our own!**

On July 26, 2016, at approximately 2310 hours, a private dozer operator, Robert Oliver Reagan III, age 35 of Friant, CA, died from fatal injuries on Division T while operating in steep terrain battling the Soberanes Fire in the Palo Colorado Canyon in Monterey County, CA.

Fireline personnel immediately responded in an attempt to assist and treat Robert Reagan, who tragically succumbed to his injuries at the scene. The area where Reagan was working is characterized by steep ridges, deep canyons and is accessible only by a network of narrow dirt roads.

Daniel Reagan described his brother as a caring man who died doing what he believed in.

"He was a very industrious person who loved to be out and actively helping people," Daniel said. "He would do anything he could to meet the needs of somebody else. He died doing something he was good at, and doing something he believed was helpful for others in need."

As we remember the loss of Robert Reagan today, let's remember to do everything we can not to repeat this tragedy. Remember Life First. Have a plan. Let's see everyone back at camp at end of shift!

## Stay Focused

There will be lots of moving heavy equipment working out on suppression and road repair today.

Conduct good briefings with your supervisor prior to starting work. Know where everyone is working.

Don't take risks today, if not sure about your assignment, take a tactical pause and confirm your assignment.

**Today's heavy metal:** 20 Water Tenders, 6 Dozers, 12 Excavators, 4 Chippers, 5 Masticators and 2 Road Graders

That's a lot of moving metal, Stay Focused...

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the KX and LX reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

## Suppression Repair Treatments

These Suppression Repair Treatments are to be used in conjunction with the Soberanes Suppression Repair Treatment Map.

### Dozer Line/ Firebreak

- Use small dozer and/or excavator to rehab line
- Pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak

### Wilderness Dozer Line:

- Use small dozer and/or excavator to rehab line
- When line cut through brush: pull back brush, berms and rocks, and spread over width of fire line
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%)
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed

### Non Wilderness Dozer Line Repair:

- If dozer line was a road before fire then maintain roadbed and drainage. Pull in berms and brush along roadside.
- If road was not present before fire then water bar, pull in berms, and disperse cut brush across fire line.

### Hand Crew

- Use hand crews to complete rehab work
- Move displaced native material (soil & duff) back onto fire line
- Pull back brush and berms and spread over the width of break
- Leave tops of felled trees attached, this will appear more natural
- Cut water bars diagonal to fire line, where natural drains occur and construct as natural as possible. If possible, at natural drain direct outlet of water into a clump of brush or rocks
- For dozer line: slash and water bars will be hand constructed

#### Trail Maintenance:

- Use small dozer (e.g., D5) and/or excavator to rehab line
- Pull back brush, berms and rocks
- When line cut through grassland: pull back berms and rocks, and spread over width of fire line
- Back blade berms perpendicular to fire line on moderate grades (0-10%).
- Install water bars/dips on all dozer lines over 10% slope (as per indicated by READ)
- Where grade is too steep or line too narrow for effective dozer work, slash and water bars will be hand constructed
- Machine and hand pile woody material into small burn-piles (no larger than 8' tall x 10' diameter covered with Clean Burn Craft Paper); placement determined by READ OR chip wood/brushy materials and disperse evenly along firebreak.
- Reestablish hiking trail along road prism
- Repair cross drains where segments of trail have been affected by suppression activities

#### Jeep Trail Repair:

- Reestablish drainage
- Pull back brush, berms and rocks, and spread over width of jeep road
- Install tank-trap (as per indicated by READ)

#### Road Maintenance:

- Disperse or chip cut brush away from roadsides
- Maintain pre-existing road drainage

#### Repair Declined

- Private landowner has indicated that no repair should occur
- Check with Repair Group READS before travelling through this area

#### Department of Defense Dozer Line:

- No suppression repair

## Communication Patterns

Working in an emergency incident situation is no simple task. We can easily offend someone by a careless slip of the tongue, pen, or through inappropriate behavior. With increased diversity there comes a need for increased sensitivity about how we interact with one another. Becoming more sensitive in our dealings with one another results in increased rapport with those whom we work and contributes to a positive and productive work environment.

*“People will forget what you said; people will forget what you did,  
but people will never forget how you made them feel “*

*Maya Angelou*

Keep up the great work and have a fabulous day !!!
